

DATALOGIC MOBILE NAMED BEST CHANNEL VENDOR

Bologna, January 28, 2010 - Datalogic Mobile was recognized by Business Solutions Magazine as a Best Channel Vendor for 2010. This is the second consecutive year that Datalogic Mobile, alongside another Datalogic Group company, Datalogic Scanning, receives this prestigious award as voted by resellers and integrators in the Automatic Data Capture Industry.

Business Solutions conducts an annual survey of readers. The survey design and scoring were executed by the magazine with help from Penn State University to assure statistical integrity. The best and worst channel vendors, as identified in the survey, are listed in the January 2010 issue of Business Solutions Magazine.

"To be voted Best Channel Vendor 2 years in a row shows us that we have made the right decisions and need to continue down this path" says Gian Paolo Fedrigo, CEO of Datalogic Mobile. "The channel is very important to us as we know our business partners are a major part of our success. This recognition is especially meaningful as voting was done during one of the toughest economic periods in modern time. We thank our channel partners and know this award reflects as much on them as it does Datalogic Mobile."
