ARCHIVE AND MANAGE ALL PICTURES TAKEN BY YOUR MATRIX™ IMAGERS

Datalogic Automation is glad to announce the new **WebSentinel™- IMAGES** Platform, that effectively complements our Matrix™ line with:

• automatic image storage
• web based image visualization
• remote access through standard web browser
• remote image download
• high level forensics

WebSentinel™-IMAGES archives captured images to enable an effective and precise analysis of reading processes and performances, thus enhancing the unrivalled advantages of camera-based auto-ID devices.
High data integrity and intrinsic evidence of images allow to quickly catch reasons of low reading performance whilst monitoring reader functionality.

WebSentinel™-IMAGES represents a unique supervisory solution in the marketplace and a compelling competitive component of Datalogic Automation imagers proposal.
