

LONG READING RANGE FOR INDUSTRIAL AND TRUCK TIRE SORTING: THE NEW STS400™

Datalogic Automation extends the STS400™ offer with its new long reading range solution for tires sorting.

Perfectly matching the high demanding requirements of large tires reading, the STS400™ long reading range is the perfect identification solution for industrial and truck tires sorting.

Thanks to its powerful illumination power achieved through the LT-020 integrated illuminator, the STS400™ long reading range delivers an unmatched reading coverage and sets new standards for automatic identification in tire industry.

STS400™ is a unique solution that provides key advantages with no compromise: STS400™ delivers top reading performance, maximizes simplicity of integration and maintenance and guarantees longer product life-cycle.
