

NEW CO2 LASER ENTERS DLA FAMILY OF LASER MARKERS

The new EOX derives from the long experience in the production of high performance and high quality laser marking sources and completes Datalogic Automation Laser Marking Product range.

Thanks to its embedded controller configuration and leveraging on the advanced features of the proprietary marking platform, EOX offers permanent coding and marking opportunity in a variety of applications, including marking on extruded material to high speed MOF.

EOX laser sources allow Datalogic Automation to offer unmatched permanent clean marking in new market segments, where it can even compete with the traditional ink jet solution in terms of ROI and performance.
