

NEW LMS: LASER MARKING SOURCE

Datalogic Automation Laser Marking is pleased to introduce the new LMS: Laser Marking Sources.

LMS products leverage DPSSL core technology and DLA extensive experience and installed base of over 10,000 marking sources worldwide.

The LMS is a unique air cooled, extremely compact DPSSL source specifically aimed at marking system integrators (OEM market).

Unmatched flexibility and its industrial air cooled design make it the perfect solution for high demanding marking and industrial applications.

The DPSS air-cooled laser source @1064nm is available at the nominal power of 15 and 20W.

The excellent beam quality, necessary for marking a broad range of materials, is one of the winning characteristics of the laser source.
