

BAGGAGE TRACKED BY DATALOGIC IN THE LARGEST ITALIAN AIRPORT!

Datalogic products lead the **Tg2** news headlines on **July 8, 2010**: in the reportage on the new baggage tracking system inaugurated in the Fiumicino airport of Rome, spotlights focused on the **controller SC6000** supplied by Datalogic Automation (the SC6000 controller was supplied with laser scanners of the “8000” series, for the baggage tracking project from the aircraft’s hold right into the hands of passengers) (see video from minute 6).
