

DATALOGIC INTRODUCES NEW DATA CAPTURE SOLUTIONS DEDICATED TO MANUFACTURING AND T&L AT PACK & EMBALLAGE AND TRANSPORT & LOGISTIK 2013

Datalogic, global leader in Automatic Data Capture and Industrial Automation markets, and world-class producer of bar code readers, mobile computers, sensors, vision systems and laser marking systems, will be introducing its full range of solutions dedicated to Transport and Logistics during Pack & Emballage in April 2013, and Transport & Logistik in May 2013.

Capitalizing on 40 years of experience in the Auto-ID sector, Datalogic will be exhibiting their full range of solutions dedicated to T&L.

Visitors will have the chance to discover the new PowerScan 9500 rugged handheld area imager. This product represents the ideal combination of Datalogic experience with optical systems, hardware architecture, mechanical design and decoding software. The PowerScan 9500 family offers an intuitive and effortless scanning experience, with a robust case made specifically for tough industrial environments.

Datalogic's full range of mobile computers including the Elf™ PDA, Skorpion™ X3 mobile computer, Falcon™ X3 mobile computer, Lynx™ PDA will also be on display, along with the Rhino™ vehicle mount terminal and the Gryphon™ and PowerScan™ 8300 families of handheld scanners.

Visitors will have the chance to discover the new POWERSCAN D8590 an ultrahigh performance handheld imager for DIRECT PART MARK reading. Thanks to a perfect combination of the embedded multi-axis Illumination system and the aggressive DPM decoding algorithms, the POWERSCAN D8590 offers an intuitive and effortless scanning experience. The POWERSCAN D8590 also offer an Industrial, rugged design to resist to repeated shocks and usage, guaranteeing reliable operations in the long term.

Datalogic's wide range of bar code readers Matrix 210,410,450 will also be on display, along with the compact embedded vision processor MX40 and the compact laser markers family ULYXE.
