

DATALOGIC SHOWCASES THE LATEST MACHINE VISION TECHNOLOGIES AT VISION CHINA 2018

Shanghai, March 1st 2018. [Datalogic](#), a global leader in automatic data capture and industrial automation markets, will attend **Vision China 2018**, the number 1 machine vision show in China, organized by the China Society of Image and Graphics (CSIG) and Messe München International (MMI).

The trade show will take place at **Shanghai New International Expo Center (SNIEC)** on **March 14-16, 2018**, together with the **LASER World of PHOTONICS CHINA** Exhibition, gathering all the international and local market leaders, as well as experts from universities and institutions.

Datalogic brings to Vision China 2018 new products, technology and solutions of Machine Vision, Identification, Sensor & Safety, Laser Marking, Hand Held Scanner, and Mobile Computer, confirming its leading role in the delivery of data-driven solutions for the manufacturing industry.

Extensive live demonstrations of multiple products and solutions will be showcased at **booth W5.5502**:

P-Series™: The P-Series is an ultra-compact cost effective smart camera offering advanced machine vision functionalities in a fully embedded stand-alone device. The P-Series is powered by the IMPACT™ LITE software package. With more than 25 inspection tools, IMPACT LITE revolutionizes device programming by making the inspection configuration quick and intuitive.

A-SERIES™/T-SERIES™: The Datalogic smart camera products are standalone, general-purpose, industrialized machine vision inspection systems with especially flexible programming through the IMPACT software.

MX SERIES™: Vision processors provide the highest performance in image processing with even more flexibility through multi-camera support. Connect to multiple camera formats at one time.

MATRIX™ SERIES □ MATRIX™ is image-based ID Scanners with high performance, dedicated to 2D imagers industrial applications in the Electronic, Automotive, Pharma, Food&Beverage and Logistic applications.

AREX™ SERIES: The AREX Series is a multi-functional and all inclusive line of fiber laser markers dedicated to direct part marking in the Automotive, Electronics, and precision mechanics industry.

UniQ™: UniQ fiber laser marker represents the perfect combination of a high performance fiber laser into an innovative, ultra-compact housing designed to provide an effective solution to the recent request of shorter, smaller production lines, in order to reduce footprint and floor area consumption.

MARVIS™: MARVIS™ will debuts at Vision China 2018, which can connect any Datalogic MATRIX N-series reader with any laser marker, enabling controlling from one single interface and enhancing individual products' performances.

Press Release

Customers are invited to visit Datalogic booth - W5.5502 and talk with our Industry Managers, Product Managers, sales executives, and other senior managers.
