

## DATALOGIC PRESENTS: THE NEXT GENERATION FALCON X4™ - VALUE HAS A NEW MEANING

**Bologna, 5 July 2018 - Datalogic**, a global leader in the automatic data capture and process automation markets, is pleased to announce the **new Falcon™ X4** Mobile Computer: a legendary device that reaches a new milestone in its track record of worldwide success!

With a choice of Windows® Embedded or Android™ operating systems, the Falcon X4 mobile computer delivers the ultimate in ergonomics, intuitive user interface, computing and data capture technologies, combined with best-in-class ruggedness. The pistol grip form factor has been conceived for comfort with ergonomic trigger for intensive or long periods of scanning.

Datalogic's mobile computer product line offers a wide range of devices suitable for any kind of indoor and outdoor application. Ranging from full touch devices to keyboard devices, the Datalogic portfolio provide state-of-the art technology and features such as wireless charging and high performance scan engine, guaranteeing maximum value and unbeatable quality.

The logistics' range of new mobile computers have been extremely successful in the past years and has set a new standard in the market. From Skorpio X4 mobile computer, the best ergonomics on the market, to the new Falcon X4, the reduction of operator fatigue is guaranteed with no compromise in terms of reliability and robustness.

The outstanding user interface is guaranteed by the high visibility 3.5 inch color touchscreen display and with the choice of 3 different keyboards, while the communication technologies feature improved connectivity and coverage (superior Wi-Fi with MIMO antenna system and CCX v4 compliance; Bluetooth® v4).

Under the hood, Falcon X4 boasts significant performance improvements – nearly 3 times faster CPU than its predecessor, while more than 7 times faster at memory access.

The Falcon X4 mobile computer is the optimal choice for any application requiring reliable data collection in mobility. Manufacturing environments can enhance work in progress, quality control, traceability and intra-logistics operations. Similarly, Falcon X4 handles everything warehousing/logistics requires for efficient day-to-day activities including: back office inventory management, shipping/receiving, ordering, picking, put away, cycle counting, etc. It can be used as well in Retail stores to ensure shelf-replenishment, price verification, stock management, inventory, and order entry. Finally, Healthcare operations can achieve higher levels of efficiency using Falcon X4 for production control and inventory management.

Tom Burke, VP of Mobile Product Marketing of Datalogic commented: “The Falcon X4 mobile computer has been designed to deliver the maximum Datalogic experience and technology for our customers belonging to all four of our reference industries, in order to fulfill any needs: from store floor to back office inventory; from warehouse management to distribution center; from 3PL to traceability in intralogistics. As further commitment to our current customers, full backwards compatibility with Falcon X3 accessories protects past investments.”
