

DATALOGIC TO SHOWCASE EXTENSIVE RANGE OF PRODUCTS AT PPMA 2018 - DATALOGIC

Redbourn, UK – 10 September, 2018 – [Datalogic](#), a global leader in automatic data capture and industrial automation markets, and world-class producer of bar code readers, mobile computers, sensors, vision systems and laser marking equipment, will be showcasing a wide range of products to visitors of this month's PPMA.

“With the most comprehensive line-up of production technologies and solutions for the food and beverage, pharmaceutical, luxury goods and FMCG sectors, PPMA provides a unique platform to demonstrate our diverse range of technology and offers an excellent forum to build relationships with new and existing customers”, comments Kamran Farooq, UK & Ireland Sales Manager, Manufacturing at Datalogic. “At PPMA 2018, we will be showcasing our full machine vision capability for the most common applications including capping and label inspection, expiration date verification, label print & check, secondary packing and more.”

From best in class vision sensors for object recognition, inspection and identification, to smart cameras with OCR capabilities, right through to safety laser scanners, safety light curtains and industrial handheld mobile computers and barcode scanners; Datalogic will showcase its end-to-end supply chain and manufacturing capability.

Visitors to the Datalogic stand can expect to find a number of demonstration areas, and executives from the company will be on hand throughout the show to discuss the latest products and solutions including:

SG4 Fieldbus safety light curtain – spanning a range of functions, from finger to hand and body protection the SG4 Fieldbus can be used in any application where standard Safety Light Curtains are currently used. Meanwhile, the addition of a POWERLINK interface creates a new solution for safety that is easy to integrate in existing networks and that communicates seamlessly with safety programmable controllers. These features result in a safety system with less wiring and hardware, fewer errors in commissioning and maintenance, preventive maintenance and an increase of the overall machine availability.

PowerScan 9100 linear imager – in the newest addition to the PowerScan family, innovative new Datalogic technology provides a green scanning line delivering the same crisp definition of a laser line with the added benefits of a linear imager. The result is outstanding 1D decoding capability with all the familiar features of rugged, ergonomic housing that offer excellent durability in demanding operational environments.

You can visit Datalogic on stand F16 at PPMA taking place at the NEC, Birmingham from 25th – 27th September, 2018.
