

# DATALOGIC TASKBOOK – THE FIRST ONE-HANDED SCANNING TABLET FOR RUGGED LOGISTICS APPLICATIONS!

Bologna, 18 April 2019. Datalogic, a global leader in the automatic data capture and process automation markets, is pleased to announce TaskBook, the perfect rugged tablet solution for inside the 4-walls logistics operations.

The TaskBook's optional handgrip integrates either a Standard or Auto Range 2D imager, including a hot swappable battery, provides top efficiency in a single-handed scanning operation 24/7. Taskbook can be easily docked into a vehicle-mounted solution, perfect for applications requiring maximum flexibility, smaller forklifts or forklifts that are not electrically driven or operated.

TaskBook is available in both a 7 inch or a 10-inch display. Both sizes are used comfortably on the user's forearm, leaving the other hand free for handling products or materials. Accessories are shared between the two form factors including the scanner handgrip, docks and chargers.

"Experience the ruggedness!", suggests Andrea Pagani, Product Manager at Datalogic.

"Thanks to the rugged housing and the IP65 rating - which means water and dust resistant - plus the 4x thick Corning® Gorilla® glass, with anti-glare multi-touch with gloves support and the 1.2 m / 4 ft repeated drops to concrete, TaskBook can be used in most any extreme environment"

The Windows 10 IoT Enterprise and the integrated rear facing 5 MP camera, make it the ideal solution for applications in logistics, maintenance, and quality control.
