

# DATALOGIC BRINGS TECHNOLOGY THAT EMPOWERS MANUFACTURING TO PACK EXPO

EUGENE, Ore., Aug. 21, 2019 /PRNewswire-PRWeb/ -- Innovative technology from Datalogic empowers manufacturers to deliver quality and traceability while maximizing their enterprise efficiency. At Pack Expo 2019, Datalogic's global leadership in manufacturing will be on display with a product offering that is unparalleled in depth and breadth.

Manufacturers worldwide look to Datalogic for technology and solutions in: high speed bar code reading; vision systems for OCR, quality inspection, and robotic guidance; worker safety from light curtains and area scanners, sensors for detection, laser marking; shop floor process tracking from handheld bar code scanners, mobile computers and much more. Manufacturers can do it all with Datalogic:

Make It Mark It Pack It Track It all with Datalogic

At PACK EXPO 2019 Datalogic will have booth LS-6371 packed with hands-on demonstrations manufacturers can experience to see how technology can impact their productivity and protect their workers. Technology innovations that drive the industry will be on display including:

- Vision tools that are easy to implement
- State of the art barcode reading solutions
- OCR and Vision tools that are easy to implement
- Sensors and Safety components for machinery, robots, and work cells
- Laser Marking solutions that can be implemented in hours instead of days

Make plans to experience firsthand the empowering technology from Datalogic at booth LS-6371. There will be plenty of product managers, sales executives, and senior managers on hand to answer questions and provide in-depth demonstrations. Mark your calendar and make plans to visit Datalogic at booth LS-6371 at PACK EXPO.

PACK EXPO 2019 takes place Sep 23 - 25, 2019 in the Las Vegas Convention Center in Las Vegas.
