

DATALOGIC SHOWCASES THE LATEST TECHNOLOGIES AT LOGIS-TECH TOKYO 2020

Tokyo, February 7th 2020. Datalogic, a global leader in automatic data capture and industrial automation markets, will attend Logis-Tech Tokyo 2020 (LTT 2020), where exhibitors and visitors discuss, actively exchange information and find their new business partner. LTT is a springboard to capture and address the diverse needs of the logistics market.

Datalogic brings to LTT 2020 new products, technologies and solutions for Identification, Hand Held Scanners, Mobile Computers, and Sensors & Safety, confirming its leading role in the delivery of data-driven solutions for the transportation & logistics industry.

Extensive live demonstrations of multiple products, technologies and solutions will be showcased at West Hall 2 booth 2U-23.

MATRIX™ SERIES MATRIX™ are high performance image-based ID Scanners, dedicated to 2D imagers' industrial applications in the Electronic, Automotive, Pharma, Food & Beverage and Logistic applications. The new Matrix 220 imager is designed for superior performance, becoming the ideal imager for Electronics, Automotive, Packaging and Document Handling applications.

PowerScan 95X1 Auto Range (AR) Series: The PowerScan 95X1 AR is the top performing industrial hand held scanner with extra-long range scanning capabilities on 1D/2D barcodes. This new addition further expands the PowerScan 9000 family offering, by including Auto Range 2D imaging models.

LASER SENTINEL™: The compact Laser Sentinel™ - safety laser scanner, provides a complete application-oriented solution with high level detection performances. It includes all functions needed for robot cells, machine protection, machine opening protections, automated guided vehicles, automated guided carts, and forklifts.

IMPACT ADVANCED OCR: is a turn-key solution designed for Optical Character Recognition applications in Food & Beverage, and Automotive industry.

MX SERIES™: These Vision processors provide the highest performance in image processing with even more flexibility through multi-camera support. Connect to multiple camera formats at one time.

The LTT 2020 trade show will gather all the international and local market leaders, as well as experts from universities and institutions at Tokyo Big Sight West Halls 1-2 on February 19-21, 2020.

Visitors are invited to stop by Datalogic at West Hall 2, booth 2U-23, discover a wide range of new solutions, and meet with our Senior Managers, Application Engineers, Product Managers, and Sales Executives.
