# DISCOVER DATALOGIC'S CUTTING-EDGE AIRPORT SOLUTIONS AT INTER AIRPORT EUROPE 2025

Munich, October 7–9 –Today's travelers require efficiency and reliability at every stage of their journey. Since 1984, Datalogic has remained at the forefront of airport automation, introducing the first automated baggage reading station. Over the years, the company has continued to develop class-leading baggage handling and identification technologies, ensuring seamless, secure, and efficient operations for airports and airlines worldwide.

## Solve baggage handling challenges with Datalogic

Datalogic brings greater efficiency to baggage handling with its comprehensive range of barcode readers, mobile computers, linear cameras, dimensioners, and RFID-based technologies.

Products such as the AV900 industrial imager and newly released AV7000 12K linear camera streamline baggage tracking, transport speed, and accuracy, reducing typical errors and delays experienced during the process. Utilizing advanced technologies, these solutions provide the perfect combination of long-range reading and 360  coverage, guaranteeing precise barcode identification and high-resolution image capture on conveyors of all sizes across airport baggage handling systems.

Airports and airlines constantly face challenges in baggage handling, including connectivity issues that can lead to misplaced luggage. The Memor™ 30-35 PDA with eSIM technology ensures uninterrupted connectivity and features a rugged design tailored for demanding airport environments. Its straightforward integration with existing systems ensures real-time tracking, thereby reducing errors and improving the overall efficiency during baggage processing.

## Save time with Datalogic's barcode scanners

Datalogic's state-of-the-art barcode readers, including the Gryphon™ 4500 and PowerScan™ 9600 series, speed up self-check-in, reducing wait times. Passengers can quickly scan baggage labels, ensuring a smooth and efficient airport experience.

As the leading global event for the airport industry, Inter Airport Europe 2025 will be a unique opportunity to discuss challenges, explore innovations, and build strategic connections.

Save the date: 7–9 October. Meet the Datalogic experts at Booth B6–646c, alongside Air Tech Italy, the leading Trade Association representing top Italian companies specialized in supplying products, technologies, and services for airports and air-traffic control.
