The right logic for visual technology

With the acquisition of Accu-Sort, Datalogic became the leader in the industrial stationary scanners segment, with a market share of around 31% (source: VDC). The Accu-Sort acquisition is part Datalogic's strategy which aims to strengthen industrial automation. We start our coverage with a target price of EUR 8.6/sh and BUY recommendation, taking into account: 1) steady development in sales on the back of the group's ability to position its offer in the high-end segment, the ongoing growth in emerging markets and the launch of new products (c. 20% of 2011 sales); 2) solid profitability sustained by the positive operating leverage and savings envisaged from the new integrated supply chain; 3) a sound financial structure, allowing the group to face external growth without financial stress; 4) an undemanding relative valuation: EV/EBITDA 2012e 6.3x (14% discount), P/E 12e 8.9x (40%).

- Datalogic is a leading producer of bar code readers, mobile data collection computers, RFID and vision systems. The group covers a wide range of applications, mainly in the retail, manufacturing and transportation and logistics sectors. The group focuses on two specific markets: Automatic Data capture (69% of 2011 sales), in which the group is a leader in POS retail scanners with a 32% market share (source: VDC), and Industrial Automation (23%), in which Datalogic, following the recent Accu-Sort acquisition, has leadership in the industrial stationery scanners with a 31% market share.
- Datalogic can rely on a well diversified geographical sales mix: in 2011, c. 10% of sales was generated in Italy (16% in 2005); Europe (excl. Italy) accounted for c. 40%, US c. 30%, while Asia and other emerging markets accounted for 20%. Following the Accu-Sort acquisition, the US is expected to account for 40% group sales.
- According to VDC research, the ADC worldwide market is expected to grow at a 8% CAGR in 2010-2013e, while in the factory automation, VDC is projecting a 8% CAGR in 2010-2013e. Given the current economic scenario, we find these projections very challenging.
- Financial forecast. We assume a more cautious view on the sales development compared to the VDC projections; however, we expect Datalogic to perform in the same manner, or even better, than its peers. We expect net sales to grow at a 2011-2014e organic CAGR of 3.5%, with ADC sales growing at a 3.8% CAGR and IA growing at 2.2% over the same period. For 2012, we expect net sales to be up by c. 3% Y/Y on an organic basis, excluding Acc-Sort and PPT Vision. The Accu-Sort acquisition is expected to double the exposure to the IA business (we estimate IA sales at around 35% of group sales in 2014e). Profitability should benefit from the adoption of a global supply chain in the ADC business, which is expected to generate annual savings in the range of EUR 12m.
- Valuation. With reasonably conservative assumptions (WACC 9.6%, g at 1.5%, and terminal EBITDA margin at 17.5%) we obtain a fair value of EUR 8.56, thus an upside of around 32% to the current market price. The peer comparison also suggests undervaluation, as DAL trades at discount of 10% to 40% against its peers on EV/EBITDA and P/E, which are not completely justified by higher country risk and limited free float. We set our Target Price at EUR 8.6.

Company overview

Founded in Bologna in 1972 as a provider of optical sensors for the textile, ceramic and packaging industries, Datalogic is today one of the leading producers of bar code readers, mobile data collection computers, RFID and vision systems. With a direct presence in 30 countries, including seven manufacturing plants and ten R&D centres, the group covers a wide range of applications in the retail, manufacturing and transportation and logistics sectors.

Datalogic focuses on two specific markets: Automatic Data capture (69% of 2011 sales), in which the group is a leader in POS retail scanners, and Industrial Automation (23%), in which Datalogic, following the recent Accu-Sort acquisition, is a leader in the industrial stationery scanners with a 31% market share. The group operates a third division, the Business development unit (8%), which currently corresponds to Informatics, the US company acquired in 2005, which works strictly with the other two divisions. Till then, the unit, which is active in the development of new business platforms within the group and the evaluation of new merger and acquisition opportunities, included Evolution Robotics, the US firm involved in the visual pattern recognition.

Datalogic's business is geographically well diversified. In 2011, c. 10% of sales was generated in Italy (16% in 2005); Europe (excl. Italy) accounted for c. 40%; US delivered EUR 123m sales, or c. 30% of group revenues; Asia has shown strong revenue growth in the last few year (12% of 2011 sales vs. <5% in 2005). Following the Accu-Sort acquisition, the US is expected to account for c. 40% group sales.

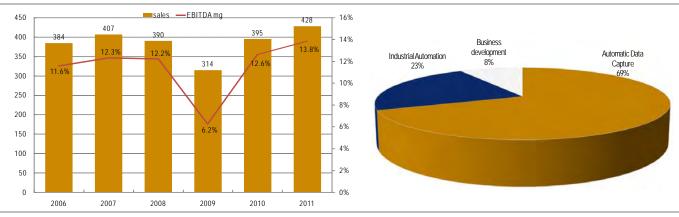

In 2011, Datalogic's net sales grew by 11% on an organic basis, showing sound performance in all divisions: ADC was up 9% Y/Y, mainly driven by scanning products (+19% Y/Y); IA posted a sound 6% Y/Y sales growth, while the former Business development unit delivered a +6% Y/Y. In the first half of 2012, Datalogic's revenue grew by 8.5% Y/Y at a constant exchange rate (+2.8% Y/Y excluding Accu-Sort); Q2 12 showed a sequential acceleration in sales growth (+4.9% Y/Y vs. +0.7% Y/Y in Q1), also benefiting from the US dollar appreciation.

Over the years, Datalogic's growth has been driven by acquisitions. The latest, Accu-Sort acquisition for USD 135m, is expected to double the exposure to the IA business (we estimate IA sales at around 35% of group sales in 2014e).

The company is majority-owned by Hydra SpA (run by the founder and chairman Mr. Volta), which owns a 68% stake; the second largest shareholder is Tamburi Investment Partners (6.4%); the free float is 20.4%.

Revenue and EBITDA mg trend (EUR m)

2011 revenues by offer

Source: Company data Source: Company data

The business model

Datalogic operates in two specific markets: Automatic Data capture (ADC) and Industrial Automation (IA) via two business divisions: Datalogic ADC and Datalogic Automation.

The group operates a third division, the Business development unit, which currently corresponds to Informatics, the US company acquired in 2005, which works strictly with the other two divisions. Till then, the unit, which is active in the development of new business platforms within the group and the evaluation of new merger and acquisition opportunities, included both Informatics and Evolution Robotics (acquired in 2010), involved in the visual pattern recognition; the latter was included in the ADC division as of January 2012 as a consequence of a divisional reorganization.

Approximately 90% of products are sold through an indirect go-to-market distribution model; Datalogic can rely on a widespread network of value-added resellers, distributors, independent software vendors and system integrators; the remaining 10% of products is sold directly to end-user customers.

Datalogic ADC

Datalogic ADC's products include in-counter and on-counter point-of-sales scanners, rugged handheld scanners, rugged mobile computers, industrial PDAs and vehicle mount computers.

LaneHawk

BOB

With two manufacturing plants, one in Saigon (Vietnam) and the other in Tmava (Slovakia), Datalogic ADC serves companies mainly involved in the Retail, Manufacturing and Healthcare sectors.

Datalogic's strategy in the ADC market is focussed on:

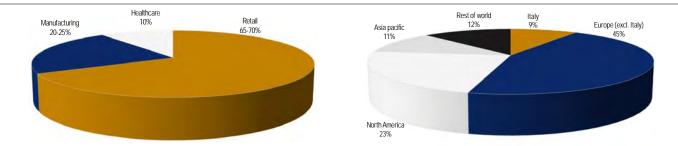

- 1) the optimisation of the distribution structure of mobile and scanning products to promptly meet customer need;
- 2) the development of highly profitable self-shopping solutions for retailers, leveraging on the robotics technology;
- 3) strengthening the healthcare market through more and more innovative handheld scanners.

Source: Company data, Banca Akros estimates

Datalogic Automation

Datalogic develops industrial products and solutions that ensure traceability, inspection and detection in manufacturing and logistics processes. Datalogic's automation portfolio includes customised industrial solutions based on laser barcode scanners and 2D imager for auto-ID, RFID and vision systems, industrial sensors, safety light curtains and laser marking.

Industrial Automation: Datalogic's offer

Source: Company data

Manufacturing and Transportation & Logistic are the main sectors served by the group. With the Accu-Sort acquisition, which is mainly focussed on T&L, we estimate manufacturing will account for less than 50% of IA group sales from the current 80%.

Datalogic's strategy in the IA market is focussed on:

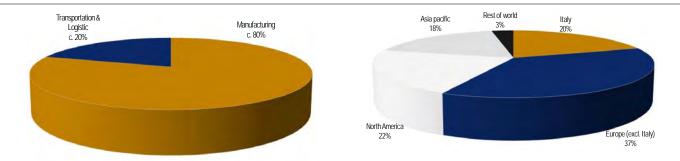

- 1) strengthening the vision and safety segments;
- 2) the development of miniature technology for sensors and fibre laser technology;
- 3) the improvement in the supply chain management.

The market

Automatic Data Capture

According to VDC, the **stationary scanner market** was worth USD 810m in 2010, including industrial scanners. Datalogic was confirmed the leader in POS retail scanners (devices used primarily to gather information to support a transaction between the retailer and the consumer).

Datalogic is also the third largest player in the **handled scanner market**, which was worth USD 770m in 2010. Motorola, leader in handheld laser scanners, maintains its leadership due to its legacy-installed bases in ADC and core mobility platforms and is well positioned to migrate its customers to more advanced and converged solutions. Honeywell, the second largest player in the handled scanner market, is the leader in 2D imager products; however, the bulk of its revenues comes from laser technology and linear imagers. Datalogic gets most of its handheld scanners revenues from linear imagers.

The main players in the ADC market

Source: Company presentation, VDC

In general, the factors that drive the growth of the ADC market are: 1) the shift to field mobility deployments; 2) the need to increase efficiency and overcome scanning errors at the point of sale; 3) a growing list of emerging applications in the government, healthcare and retail sectors; 4) enterprises require more data than ever to effectively manage their supply chain.

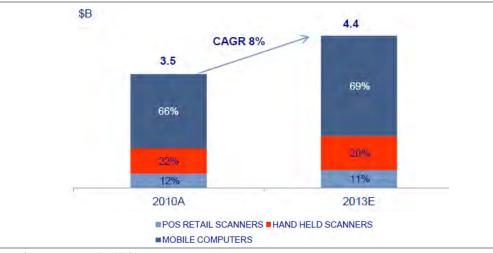

According to VDC, the **stationary scanner market** is expected to grow at a 6% CAGR over the period 2011-2015e, when the market is anticipated to approach USD 1.1bn. This growth will be driven: 1) in developed countries, by the growing need of existing customers to replace legacy equipment with more robust stationary scanning solutions and complement their existing applications with new applications designed to improve business processes; 2) in emerging markets, by the growing investment in stationary solutions to support industrial applications in the rapidly expanding manufacturing and warehousing environments.

According to VDC, the **handheld scanner market** is expected to grow at a 9.1% CAGR over the period 2011-2015e. This growth will be driven by: 1) the increasing need to gather more information than ever about materials in transit; 2) the increasing focus on improving efficiency while reducing costs within supply chains.

According to Datalogic's management, the ADC market (retail stationary scanners, handheld and mobile computers) is expected to be worth c. USD 4.4bn in 2013e, showing an 8% CAGR over the period 2010-2013e.

The ADC market

Source: Company presentation, VDC

Industrial Automation

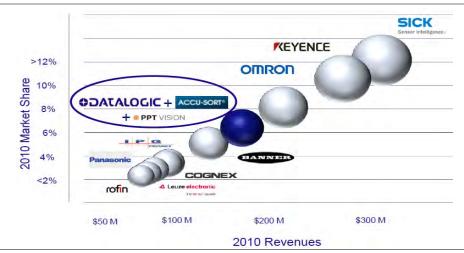

Industrial automation is a very fragmented industry. Following the acquisition of Accu-Sort, Datalogic became the leader both in the industrial laser scanner segment and the industrial imager segment. Industrial scanners, which are characterized by a high degree of customization, are used primarily to gather information about components and products as they move through the production and distribution processes.

Key vertical markets spurring demand for industrial stationary scanners in the transportation and logistics sectors include parcel/post, warehousing and air travel where stationary scanners are frequently positioned on or over conveyance systems to identify and route materials efficiently.

The main players in the IA market

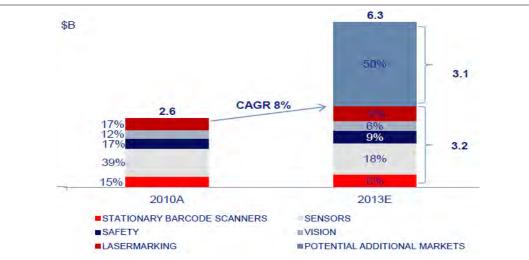

Source: Company data, VDC

Industrial users continue to embrace lasers due to the cost and performance advantages (more aggressive scanning at longer distances); however, they are increasingly complementing these solutions with industrial imagers as a means to support image capture requirements.

The factors that drive demand are: 1) the increasing need for the traceability of processes and goods; 2) supply chain streamlining; 3) increased adoption of IA solutions in the emerging markets.

According to Datalogic's management, the IA market is expected to be worth c. USD 3.2bn in 2013e, showing a 8% CAGR over the period 2010-2013e; moreover, the group estimates the potential additional market for IA is worth c. EUR 3.1bn in 2013e; this is totally related to the machine vision market for industrial purposes (imaging-based automatic inspection). This is the potential market where Datalogic aims to grow through M&A opportunities (the recent PPT acquisition confirms this strategy).

The IA market

Source: Company presentation, VDC

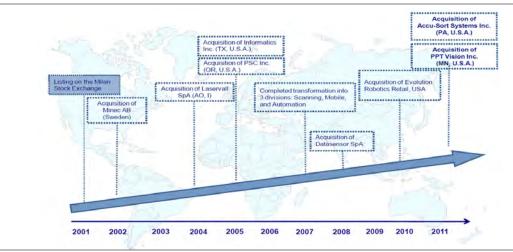

Focus on the IA market

In a sector characterised by rapid technological changes, Datalogic has grown both internally and through acquisitions. Since its foundation, Datalogic has played an active role (as a consolidator) in corporate actions; in the 80s, the group began its international expansion by acquiring Escort Memory Systems, a US company active in the market of electronic tags and RFID technology.

Proven history of acquisitions

Source: Company presentation

The external growth strategy is currently focussed on the acquisition of firms operating in Industrial Automation.

In December 2011, Datalogic acquired 100% of **PPT Vision** for USD 5.2m. With c. 30 workers, PPT is a US company specialized in multi-camera vision systems used in quality control and inspection in the manufacturing industry.

PPT Vision's products are sold through a global network of distribution and integration partners to end-user manufacturers, original equipment manufacturers, and manufacturing machine builders, in a wide variety of manufacturing markets including electronics, automotive, medical device, pharmaceutical, food & beverage, printing, plastic and packaged goods industries.

PPT Vision: hardware products

Source: Company web site

PPT Vision reported 2011 revenues of USD 6m; the implied ratio of the deal was 0.9x EV/Sales (vs. 1.0x Datalogic); note that the company was debt free.

A significant portion of the value of PPT Vision was represented by intangible assets such as patents, trade secrets, copyrights and other intellectual property rights. PPT Vision holds four patents and two patent applications filed with the United States Patent and Trademark Office.

The acquisition of patents and expertise in the field of vision technology, complementing those already existing and developed by Evolution Robotics Retail subsidiary for the retail market, further strengthen Datalogic's position in the market of machine vision.

In January 2012, Datalogic completed the acquisition of **Accu-Sort**, a US supplier in the design, production, integration and maintenance of Auto-ID systems, for USD 135m on a debt free basis.

Accu-Sort offers integrated solutions in the high-end segment thanks to long-term relationships with primary retailers, international couriers and system integrators. Approximately 80% of revenues were generated in the US. The intellectual property portfolio consists of c. 80 patents.

In 2011, the company, which employs c. 250 workers, generated USD 106m sales and USD 21m EBITDA, up by 15% and 17% Y/Y respectively. The implied ratios of the deal were 1.3x EV/Sales and 6.5x EV/EBITDA (vs. 1.0x and 6.3x, respectively, for Datalogic).

With the acquisition of Accu-Sort, Datalogic became the leader in the industrial stationary scanners segment, with a market share of around 31%.

The consolidation of Accu-Sort is expected to double the exposure to the IA business and strengthen Datalogic presence in the US; in terms of market served, Datalogic is expected to consolidate its positioning in the transportation and logistics market. For 2012, we expect sales and EBITDA to be in the range of EUR 70m and EUR 13m, respectively, thus confirming the sound profitability (EBITDA mg of c. 20%). Note that Accu-Sort works to orders; the weak performance seen in the first part of the year comes as a consequence of the non-completion of several projects, which are expected to be partially completed in H2 12.

According to Datalogic's management, 2012 will be characterised by the integration of Accu-Sort in the Datalogic structure; first synergies are envisaged from 2013.

Datalogic: track record of acquisitions

Year	Company acquired	Market	Headq.	Main countries served	Products	Stake	Deal value	Transaction multiples
2004	Laservall	IA	Italy	Italy, North America, Asia	Laser marking of components and ID document	90%	EUR 8.5m + EUR 6m earn out	0.8x sales, 3.1x EBITDA
2005	Informatics	ADC	US	North America	Barcode readers and RFID	100%	USD 23m	0.7x sales
2005	PSC	ADC	US	worldwide	Retail scanners, handheld and mobile computers	100%	USD 195m	0.9x sales, 9.0x EBITDA

2011	PPT Vision	IA	US	worldwide	Machine vision	100%	USD 5m	0.9x sales

Source: Company data, Banca Akros estimates

Financials

- Since its foundation, Datalogic posted impressive revenue growth until 2007 (24% CAGR over the period 2001-2007), benefitting from both organic growth and acquisitions. The macroeconomic deterioration reversed the sales trend in 2008 (c. -5% Y/Y organic) and 2009 (-24% Y/Y org.), while a sustained rebound was seen in 2010 (+23% at constant exchange rates) and sound performance was achieved in 2011 (+11% Y/Y).
- Datalogic can rely on pretty good gross profit margins thanks to the high technological content (products are generally positioned in the high-end market); gross margins ranged from 42% in 2009, when the group suffered from severe price pressure and declining volumes, to 46% in 2011, when performance was sustained by new profitable products.
- Excluding the drop in profitability seen in 2009 due to the deep sales decline (EBITDA mg of 6%), the group's profitability was in a narrow range between 12% and 14% over the period 2007-2011, showing the highest level last year thanks to higher volumes Y/Y, the launch of new products and cost savings.
- A relatively low level of recurring investments: excluding acquisitions, capex stands approx. at 2-3% of group sales.
- Datalogic's current debt level (EUR 172m as at March 31) was due for a large part to the acquisition of Accu-Sort; a strong NWC absorption affected the Q1 net debt dynamic due to the turnover acceleration in March.

Innovative products, a careful price policy and cost containment measures supported group results

Datalogic reported double digit revenue growth over the period 2001-2007 (+24% CAGR). Excluding the external growth, sales increase was basically propped up by a deep insight of the market and a strong commitment with the leading retailers and transportation and logistics companies.

Looking at the **sales** trend, we note that in 2008, after sound annual revenue growth in 2001-2007, Datalogic suffered from declining sales in the second part of the year as a consequence of the increased difficulties in the macroeconomic scenario; Automation saw a stop on several projects. A deep sales decline, coupled with margins squeeze, was seen in 2009 (sales down 24% Y/Y, on an organic basis) as a consequence of the strong macroeconomic deterioration: ADC posted a 23% revenue decline (mobile down 27% Y/Y, scanning down 21%), while IA fell by 4%.

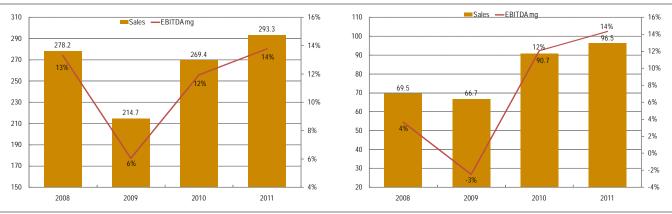

This drop was the consequence of declining volumes, partially offset by the launch of new products, rather than price pressure. In 2010, the improvement in the macroeconomic scenario, which led companies to restart investments that had previously halted, allowed Datalogic to post a significant turnover recovery in both divisions (ADC and IA). By geographical area, Asia and emerging markets showed impressive growth rates driven by the need of companies operating in those countries to adopt innovative solutions for tracking industrial processes. This trend was confirmed in 2011, though growth was slower. In 2011, net sales grew by 11.1% Y/Y at a constant exchange rate.

ADC - sales and EBITDA mg trend (EUR m)

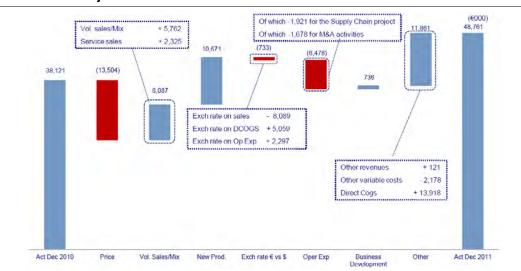

IA - sales and EBITDA mg trend (EUR m)

Source: Company data Source: Company data

When we analyse the group **profitability**, on par with the sales trend, we note the deep EBITDA mg decline in 2009, when the EUR 68m net sales decline translated into a 6.3pp margin fall; although the group was able to achieve EUR 24m savings, due to the implementation of a cost cutting plan mainly focussed on personnel reorganization, lower volumes impacted EBITDA in the range of EUR 49m. In 2010, a more favourable economic scenario (sales up 23% Y/Y at a constant exchange rate), coupled with careful cost structure management, led Datalogic to post a 6.4pp increase in the EBITDA margin; the impact on EBITDA of higher volumes Y/Y was in the range of EUR 48m (excluding new products which added further profitability of c. EUR 8m), while the price pressure impact on EBITDA stood at c. EUR 19m. A Y/Y improvement in margins (excluding non-recurring costs of EUR 8.4m related to the new supply chain for the ADC) was seen in 2011; on the positive side we highlight higher volumes, the launch of new products and cost savings; on the negative side we note the c. EUR 14m impact from lower prices Y/Y.

2011/2010 EBIT adjusted* variance

Source: Company presentation, (*) before non-recurring items and D&A from acquisitions

At a group level, the cost of goods sold generally accounts for c. 60% of total costs, while distribution and R&D costs are 22% and 7% respectively.

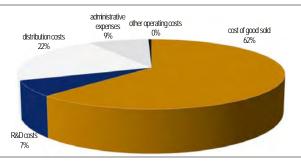

R&D investments, which are almost totally charged to the P&L, account for c. 6.5-7% of group sales.

Labour cost was one third of total costs in 2011; at the end of 2011, the group employed c. 2,500 workers (65% in the ADC business and 35% in the IA division) compared to 2,020 workers in 2010. The relocation from the Italian plants to the Vietnamese plant allowed the group to reduce its personnel expenses due to the evident lower cost per employee in the Asia region.

Datalogic: 2011 cost structure

Source: Company data

We remind investors that US dollar accounted for c. 50% of sales and 60% of costs in 2011 (we expect c. 60% and 70%, respectively, in 2012e), thus leading the group not to be heavily affected by the US dollar fluctuations in terms of profitability.

A cash generating company

Over the last five years, Datalogic has demonstrated it is a cash generating company, with low cash absorption in NWC, excluding acquisition effects, and low capex (2% of group sales); operating FCF has been greatly covered by the cash outlay for dividends. NWC on sales improved in the last three years, moving from 18.3% in 2008 to 10% in 2011.

Net debt evolution was affected by: 1) acquisitions (Datasensor in 2008, Evolution Robotics in 2010, PPT vision in 2011 and Accu-Sort in early 2012); 2) trading of own shares; 3) cash out for extraordinary costs related to the integration of the acquired companies and the reorganizational structure, including the new supply chain and the transfer of production from Italy to Vietnam and Slovakia in 2010 and 2011; 3) NWC dynamics (high cash generation in 2009 and 2010, strong absorption in the first three months 2012).

In detail, the EUR 44m debt worsening in 2008 was the consequence of the Datasensor acquisition (EUR 42m) and the purchase of own shares for EUR 23m. In 2009, in spite of the positive NWC dynamic, net debt improved just by EUR 6m due to c. EUR 13m non-recurring out-flows for bonuses, early retirement plans and severance payments related to the restructuring plan. The sound Operating FCF in 2010 as a results of an efficient stock and receivables management, led to a net debt improvement Y/Y despite the Evolution Robotics acquisition (USD 26m) and dividend payment of EUR 8m. In 2011, once again, robust cash generation was the reason for a net debt improvement; the cash-in from the disposal of treasury shares offset the EUR 4m cash out for the acquisition of PPT Vision.

Net debt position deteriorated in the first three months of 2012, when Datalogic posted a strong NWC absorption as a consequence of the turnover acceleration in March. In addition, the cash-out for the Accu-Sort acquisition had a negative impact in the range of EUR 100m.

Source: Banca Akros estimates

H1 12e preview: sound top-line, focus on cost savings and NWC dynamic

On July 16, Datalogic released its preliminary Q2 12 sales figures, showing a 15.3% Y/Y growth. Excluding the contribution from Accu-Sort and PPT Vision (c. EUR 11m), Q2 sales grew by 4.9%; this compares with 0.7% Y/Y growth in Q1 12.

Q2 12 sales benefitted from US dollar appreciation; at a constant exchange rate, sales grew by 8.6% Y/Y (+8.3% Y/Y in Q1 12). Accu-Sort generated just EUR 11m in Q2 12; note that the company works to orders; the weak performance seen in the first part of the year comes as a consequence of the non-completion of several projects, which are expected to be partially completed in H2 12.

Datalogic is due to release its H1 12 results on July 30. We expect Q2 group profitability at the same level as Q1 11 but improving sequentially (EBITDA mg of 11.3% in Q1), due to: 1) EUR 5m sales increase Y/Y (excl. the Acc-Sort and PPT contribution); 2) weak Accu-Sort profitability, considering the low sales level; 3) some savings due to supply chain reorganization in the ADC segment.

Net debt is expected to be stable vs. March 31, in spite of EUR 8.8m dividends; we expect a group deleveraging in H2 driven by higher profitability H/H boosted by Accu-Sort performance and careful inventory management.

Datalogic H1 2012 preview (EURm)

	Q2 11	Q2 12e	Y/Y	H1 11	H1 12e	Y/Y

Outlook

The 2011-2013e business plan (approved in June 2011), which excludes the recent acquisition of PPT Vision and Accu-Sort, provides for sales in the range of EUR 470-480m in 2013e, EBITDA mg in a narrow range between 17% and 18% in 2013e and capex at about 2% of sales.

In September, the group is expected to release its new business plan, including the impact of the recent acquisitions. Focus will be on M&A activity and cost savings following the implementation of the new supply chain and the integration of the recently acquired companies.

We have drawn up the following projections based on: 1) the growth expectations for the ADC and IA markets as shown by VDC, the specialized independent analyst firm, however assuming a lower growth rate given the tough economic scenario; 2) the current Datalogic trading conditions (Q2 12 sales up by 4.9% Y/Y, improving sequentially), 3) the contribution from the recently acquired Accu-Sort and PPT.

For 2012, we expect net sales to be up by c. 3% Y/Y on an organic basis, excluding Acc-Sort and PPT Vision. We estimate c. EUR 70m sales from the consolidation of the two above mentioned companies. In H1 12, Acc-Sort and PPT Vision generated EUR 20.6m sales; according to the management, the weak sales trend seen in the first half of the year will be partially offset by sound revenue increase in H2 12. This is due to the fact that Accu-Sort works to orders; on the back of the new orders intake the management is confident Accu-Sort will recover its solid sales growth trend in H2.

We expect net sales to grow at a 2011-2014e organic CAGR of 3.5%, with ADC sales growing at a 3.8% CAGR, IA growing at 2.2% over the same period and Informatics (7% of 2012e sales) up by c. 7%.

We expect ADC to account for 56% of 2014e sales vs. 69% in FY 11; on the other hand, we project IA at a 37% of group sales in 2014e vs. 23% in FY 11.

Looking at profitability, 2012 should benefit from the adoption of a global supply chain in the ADC business, which is expected to generate annual savings in the range of EUR 12m (mainly related to personnel, raw materials savings and distribution). We do not expect any further extraordinary costs from restructuring. In 2013, the cost structure should benefit from synergies in the IA division following the completion of the integration with Accu-Sort.

For 2012, we project a 0.3pp increase in the contribution margin (as % of net sales) mainly due to the cost savings the group is expecting by implementing the new integrated supply chain.

As of 2013e, we expect an additional improvement in the contribution margin (+1.0pp Y/Y) thanks to the full integration of Accu-Sort (+0.8pp Y/Y) and further savings from the new SCM (+0.2% Y/Y).

We project R&D costs at around 6.5% of net sales, at a similar % of sales as the previous years. We expect a lower incidence of distribution costs and administrative expenses on net sales as a consequence of both the positive operating leverage and savings expected from the new SCM and the improvement in the ERP platform.

Low capital intensity (we project capex at around 2.5%-3%) and a low corporate tax rate (no taxes in Vietnam until 2015, 20% tax rate in Slovakia) should support a solid FCF generation.

Datalogic: cost structure 2011-2016e (EUR m)

	2011	2012e	2013e	2014e	2015e	2016 e

Source: Banca Akros estimates

We estimate net debt in the range of EUR 140-145m as at December 31, 2012. The US dollar appreciation doesn't play in favour of better leverage, considering that c. 20% of gross debt is in USD. We expect a net debt improvement in H2 vs. H1, driven by higher profitability H/H (improved Accu-Sort performance) and a better NWC dynamic due to a careful inventories management.

In the short/mid term, we expect high FCFE generation thanks to good cash flow, careful working capital management and low maintenance capex. After the increase in net working capital to 16-18% on sales in 2007-2009, the group was able to reduce this ratio to 10% in 2010-2011. We envisage some pressure in H1 12 NWC due to high inventory; however, we are confident Datalogic will be able to better manage inventories in the second half of the year. We assume net working capital at 10% of sales over the coming years.

Valuation

We value Datalogic using a DCF (WACC 9.6% and perpetual growth "g" of 1.5%). We start our coverage with a target price of EUR 8.6/sh and BUY recommendation, taking into account: 1) steady development in sales on the back of the group's ability to position its offer in the high-end segment, the ongoing growth in emerging markets and the launch of new products; 2) solid profitability sustained by the positive operating leverage and savings envisaged from the new integrated supply chain; 3) a sound financial structure, allowing the group to face external growth without financial stress; 4) an undemanding relative valuation: EV/EBITDA 2012e 6.3x (14% discount), P/E 12e 8.9x (40%).

DCF valuation

We have run our DCF analysis based on the following assumptions:

- sales and profitability forecast: a) see above 2011/2016e estimates; b) a net sales CAGR of 2.9% for 2016/2020e; c) a terminal EBITDA margin at around 17.5% (conservatively set as the average profitability over the period 2012e-2020e);
- a normative tax rate of 30%, although the group will benefit from a low tax rate from the Vietnamese operations in the next three years;
- a WACC of 9.6% including: a) a risk-free rate of 4.5% and a market risk premium of 4.0%; b) capital structure including 85% equity; c) a beta at 1.5;
- a conservative terminal growth rate of 1.5%;
- a net debt at the end of 2012 of EUR 144m.

We come to a fair value of EUR 8.56/sh.

The sensitivity analysis below illustrates the effect of changes in WACC, terminal growth rate and terminal EBITDA mg.

Assuming a zero LT growth rate, our DCF model would point to a TP of EUR 7.3/sh, implying an upside of ca 12% on the current stock price.

MACC	Perpetual growth rate (g)									
WACC	0.0%	0.5%	1.0%	1.5%	2.0%	2.5%	3.0%			
8.1%	9.52	10.15	10.88	11.71	12.68	13.83	15.20

9.1%	7.87	8.34	8.87	9.47	10.15	10.94	11.85			
9.6%	7.18	7.59	8.05	8.56	9.14	9.80	10.57			
10.1%	6.56	6.92	7.32	7.76	8.26	8.82	9.47			
10.6%	6.01	6.32	6.67	7.06	7.49	7.97	8.52			
11.1%	5.51	5.78	6.09	6.43	6.80	7.22	7.69			

WACC	Normalised EBITDA Margin									
WACC	16.0%	16.5%	17.0%	17.5%	18.0%	18.5%	19.0%			
8.1%	9.08	9.38	9.67	9.97	10.26	10.56	10.86			
8.6%	8.62	8.91	9.19	9.47	9.75	10.03	10.31			
9.1%	8.20	8.46	8.73	9.00	9.27	9.53	9.80			
9.6%	7.80	8.05	8.31	8.56	8.82	9.07	9.32			
10.1%	7.42	7.66	7.91	8.15	8.39	8.63	8.88			
10.6%	7.07	7.30	7.53	7.76	7.99	8.23	8.46			
11.1%	6.73	6.96	7.18	7.40	7.62	7.84	8.06			

Using a reverse-DCF, we find that the growth and margin assumptions factored into the share prices are very pessimistic.

At the current share price (EUR 6.5), and by assuming mid-term EBITDA margins of 17.5%, the stock is factoring in a negative terminal growth of -1.1%.

Assuming 1.5% perpetual growth, the current stock price *is* factoring in a 12.6% terminal EBITDA mg, a profitability level, excluding non-recurring items, similar to that achieved in 2007-2010 (with the exception of 2009, when the group suffered from sales contraction). However, we note that in that period Datalogic didn't benefit from any cost savings from the adoption of the new supply chain (effective from this year) and the relocation from the Italian plants to the Vietnamese plant (2011).

Peer multiples valuation

Datalogic's main listed competitors are large multinational groups whose activities include, among other businesses, those carried out by Datalogic, but also other operations and therefore are not direct comparables in our opinion. We are referring to Motorola Solutions, Honeywell, Denso Corp. and Omron. Our cluster of comparables includes four companies specialized in the ADC segment and one firm involved in the IA market (see appendix for a brief description).

Peers company data

Company	Currency	Mkt Cap* (m)	Net debt/(net cash) 11 (m)	Sales 12e (m)	EBITDA mg 12e	Sales CAGR 11-13e	EBITDA CAGR 11-13e

Source: FactSet (*) Prices as of 25 July 2012

We note the following:

- 1) The low 2012e Intermec profitability is a consequence of the corporate restructuring plan announced in June. The plan seeks to lower the company's general and administrative and support costs: Intermec expects to eliminate approximately 170 positions or 7% of its global workforce.
- 2) Cognex, thanks to its positioning in the high-end segment of the factory automation can generate a higher profitability than its peers.
- In our cluster, Datalogic appears to have the highest sales and EBITDA CAGR 2011-2013e.

Compared to its international peers, Datalogic is trading at undemanding multiples (2012e EV/EBITDA of 6.3x and P/E of 8.9x, c. 14% and 40% below the sector average, respectively). This discount can only be partially justified by higher country risk and the limited free float.

Source: ESN estimates

On the basis of the median 2012 and 2013 EV/EBITDA and P/E multiples, we come to an equity value ranging between EUR 7.7/sh and EUR 13.1/sh; low valuations based on forward EV/EBITDA ratios are due to the high leverage of the group following the recent Accu-Sort acquisition.

Appendix

Peers description

Datalogic's main listed competitors are large multinational groups whose activities include, among other things the activities carried out by Datalogic and therefore are not direct comparables in our opinion. We are referring to:

- Motorola Solutions, a US-based data communications and equipment provider. The group develops data capture, wireless, infrastructure, bar code scanning, two-way radios and wireless broadband networks. Motorola Solutions also produces public safety and government products, voice and data communications products and systems, and wireless LAN securities. The Enterprise Mobility solutions, involved in the ADC market, generated USD 2.85bn sales in 2011.
- 2) Honeywell, an international conglomerate with diversified holding in aerospace, building control, homes and industry, auto motive products, turbochargers and specialty materials. Honeywell Scanning and Mobility division (USD 466m sales, up by 13% Y/Y) is a leading manufacturer of high-performance image- and laser-based data collection hardware, including rugged mobile computers, bar code scanners and scan engines. The main vertical markets served worldwide through a close network of distributors and resellers are: retail, healthcare, transportation and logistics.
- 3) **Denso Corp**, a Japan-based company, a leader in the global automotive supply of advanced technology, systems and components in the areas of thermal, powertrain control, electric, electronics and information and safety. Its customers include all the world's major carmakers. Through its subsidiary Denso Wave (EUR 300m sales in FY 11 ended to March 31), the group develops, designs and sells: 1) automatic data capture equipment such as bar code readers, 2D code readers (Denso was the inventor of the QR code) and IC card readers/writers; 2) robots for factory automation; 3) programmable controllers to contribute productivity improvement in industrial fields. ADC accounted for 38% of 2011 Denso Wave sales, or EUR 113m; factory automation 27% or EUR 81m.
- 4) **Omron**, leader in Japan in the factory automation systems business, providing different products, including FA controllers, sensors, switches, relays and safety devices, which help production sites to achieve improved productivity. Industrial automation business accounted for the 44% of group sales in 2011, or JPY 271bn.

Our cluster of comparables includes four companies specialized in the ADC segment and one firm involved in the IA market.

Intermec. The US-based group develops, manufactures and integrates technologies that identify, track and manage supply chain. The group generates its revenues primarily through the sale of products and post-warranty equipment service and repair contracts, as well as other managed services. Its core technologies include RFID (radio frequency identification), mobile computing and data collection systems, bar code printers and label media. In 2011, Intermec delivered sales of USD 848m (+9% Y/Y organic), of which ADC products accounted for 70% of sales, maintenance and support 17% and voice solutions 13%.

Psion. The UK-based group provides enterprise mobile computing solutions, integration services, and product support and maintenance services worldwide. The Company designs, manufactures and supplies rugged, handheld and vehicle-mounted devices. Its devices are mainly used by warehouse, campus and field-based/mobile operatives. The Company operates in three segments: hardware, software and professional services, and customer services and support. In 2011, Psion posted sales of USD 176m (+1% Y/Y), of which ADC products accounted for 73% of sales, maintenance and support 21% and software 6%.

Zetes. The Brussels-based group is a leading European system integrator and provider of innovative supply chain solutions and services. Zetes is active in the automatic identification and traceability sector, offering solutions based on different technologies (barcodes, RFID, voice recognition, label print, matrix code, visual recognition, serialisation).

Zebra Technologies. The US-based group is leader in the design and sale of industrial printing for labels, receipts and tickets. In 2011, Zebra generated USD 984m sales (+10% Y/Y), of which 76% from hardware, 19% from consumable materials (ie sticky labels) and 5% from maintenance and support services.

Cognex. Cognex is a leading worldwide provider of machine vision systems for manufacturing and industrial identification in order to automate task. Cognex vision and ID systems are used throughout the production and distribution process to optimize product quality, reduce manufacturing costs and track items throughout the supply chain. The US-based company has regional offices and distributors located throughout North America, Japan, Europe, Asia and Latin America. In 2011, c. 73% of sales came from factory automation.

Peers' comparison: 2011 sales by geographical area

ESN Recommendation System

The ESN Recommendation System is **Absolute**. It means that each stock is rated on the basis of a **total return**, measured by the upside potential (including dividends and capital reimbursement) over a **12 month time horizon**.

The ESN spectrum of recommendations (or ratings) for each stock comprises 5 categories: Buy, Accumulate (or Add), Hold, Reduce and Sell (in short: B, A, H, R, S).

Furthermore, in specific cases and for a limited period of time, the analysts are allowed to rate the stocks as **Rating Suspended (RS)** or **Not Rated (NR)**, as explained below.

Meaning of each recommendation or rating:

- Buy: the stock is expected to generate total return of over 20% during the next 12 months time horizon
- Accumulate: the stock is expected to generate total return of 10% to 20% during the next 12 months time horizon
- Hold: the stock is expected to generate total return of 0% to 10% during the next 12 months time horizon.
- Reduce: the stock is expected to generate total return of 0% to -10% during the next 12 months time horizon
- Sell: the stock is expected to generate total return under -10% during the next 12 months time horizon
- Rating Suspended: the rating is suspended due to a capital operation (takeover bid, SPO, ...) where the issuer of the document (a partner of ESN) or a related party of the issuer is or could be involved or to a change of analyst covering the stock
- Not Rated: there is no rating for a company being floated (IPO) by the issuer of the document (a partner of ESN) or a related party of the issuer

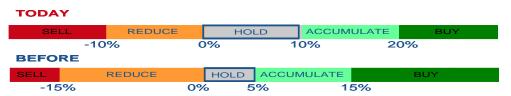

Buy 2% Hold 37% Accumulate 38%

History of ESN Recommendation System

Since 18 October 2004, the Members of ESN are using an Absolute Recommendation System (before was a Relative Rec. System) to rate any single stock under coverage.

Since 4 August 2008, the ESN Rec. System has been amended as follow.

- Time horizon changed to 12 months (it was 6 months)
- Recommendations Total Return Range changed as below:

Il presente documento è stato redatto da Francesco Di Gregorio e Francesco Previtera che svolgono funzioni di analista presso Banca Akros SpA ("Banca Akros"), soggetto responsabile della produzione del documento stesso.

Banca Akros è una banca autorizzata anche alla prestazione di servizi di investimento appartenente al Gruppo Bipiemme Banca Popolare di Milano (il "Gruppo"), ed è soggetta all'attività di direzione e coordinamento di Banca Popolare di Milano (la "Capogruppo"). La banca è iscritta all'albo delle Banche al n. 5328 ed è soggetta alla regolamentazione e alla vigilanza di Banca d'Italia e Consob. La banca ha prodotto il presente documento solo per i propri clienti professionali ai sensi della Direttiva 2004/39/CE e dell'Allegato 3 del Regolamento Intermediari Consob. Esso è distribuito dal giorno 26 luglio 2012.

Banca Akros, ai sensi degli artt. 69 quater e quinquies del Regolamento Consob in materia di Emittenti, dichiara di non avere propri rilevanti interessi finanziari negli strumenti finanziari oggetto del presente documento ovvero rilevanti conflitti di interesse derivanti da rapporti con l'emittente detti strumenti finanziari (l'"Emittente") ovvero, più in generale, derivanti da operazioni descritte nel presente documento. Banca Akros dichiara di non essere a conoscenza della sussistenza di rilevanti interessi finanziari e/o di rilevanti conflitti di interesse della Capogruppo nei confronti dell'Emittente.

Gli analisti Francesco Di Gregorio e Francesco Previtera, che hanno redatto il presente documento, hanno maturato una significativa esperienza presso Banca Akros e altri intermediari. Gli analisti e i loro familiari non detengono Strumenti Finanziari emessi dall'Emittente, né svolgono ruoli di amministrazione, direzione o consulenza per l'Emittente, né gli analisti ricevono bonus, stipendi o altre forme di retribuzione correlate, direttamente o indirettamente, al successo di operazioni di investment banking.

Banca Akros, nell'ultimo anno, non ha pubblicato studi sulla società oggetto di analisi in quanto trattasi di inizio copertura.

La Banca rende disponibili ulteriori informazioni, ai sensi delle disposizioni Consob di attuazione dell'art. 114, comma 8 del D.Lgs 58/98 (TUF) ed in particolare ai sensi dell'art. 69 quinquies, comma 2, del Regolamento Emittenti, presso il proprio sito internet (si veda http://bancaakros.webank.it/pdf/3-MktAbuse-DAF-sitointernet-conflitti-aggiornato.pdf).

Le informazioni e le opinioni contenute in questo documento si basano su fonti ritenute attendibili. La provenienza di dette informazioni e il fatto che si tratti di informazioni già rese note al pubblico è stata oggetto di ogni ragionevole verifica da parte di Banca Akros. Banca Akros tuttavia, nonostante le suddette verifiche, non può garantire in alcun modo né potrà in nessun caso essere ritenuta responsabile qualora le informazioni alla stessa fornite, riprodotte nel presente documento, ovvero sulla base delle quali è stato redatto il presente documento, si rivelino non accurate, complete, veritiere ovvero corrette.

Il documento è fornito a solo scopo informativo; esso non costituisce proposta contrattuale, offerta o sollecitazione all'acquisto e/o alla vendita di strumenti finanziari o, in genere, all'investimento, né costituisce consulenza in materia di investimenti. Banca Akros non fornisce alcuna garanzia di raggiungimento di qualunque previsione e/o stima contenuto nel documento stesso. Inoltre Banca Akros non assume alcuna responsabilità in merito a qualsivoglia conseguenza e/o danno derivante dall'utilizzo del presente documento e/o delle informazioni in esso contenute. Le informazioni o le opinioni ivi contenute possono variare senza alcun conseguente obbligo di comunicazione in capo a Banca Akros, fermi restando eventuali obblighi di legge o regolamentari.

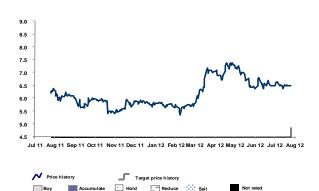

E' vietata la riproduzione e/o la ridistribuzione, in tutto o in parte, direttamente o indirettamente, del presente documento, non espressamente autorizzata.

Percentuale delle raccomandazioni al 30 giugno 2012

(*) Si informa che la percentuale degli emittenti in potenziale conflitto di interessi con Banca Akros è pari al 14% del totale degli emittenti oquetto di copertura

These reports have been prepared and issued by the Members of European Securities Network LLP ('ESN'). ESN, its Members and their affiliates (and any director, officer or employee thereof), are neither liable for the proper and complete transmission of these reports nor for any delay in their receipt. Any unauthorised use, disclosure, copying, distribution, or taking of any action in reliance on these reports is strictly prohibited. The views and expressions in the reliance on these reports is strictly prohibited. The views and expressions in the reports are expressions of opinion and are given in good faith, but are subject to change without notice. These reports may not be reproduced in whole or in part or passed to third parties without permission. The information herein was obtained from various sources. ESN, its Members and their affiliates (and any director, officer or employee thereof) do not guarantee their accuracy or completeness, and neither ESN, nor its Members, nor its Members' affiliates (nor any director, officer or employee thereof) shall be liable in respect of any errors or omissions or for any losses or consequential losses arising from such errors or omissions. Neither the information contained in these reports nor any opinion expressed constitutes an offer, or an invitation to make an offer, to buy or sell any securities or any options, futures or other derivatives related to such securities ('related investments'). These reports are prepared for the clients of the Members of ESN only. They do not have regard to the specific investment objectives, financial situation and the particular needs of any specific person who may receive any of these reports. Investors should seek financial advice regarding the appropriateness of investing in any securities or investment strategies discussed or recommended in these reports and should understand that statements regarding future prospects may not be realised. Investors should note that income from such securities, if any, may fluctuate and that each security's price or value may rise or fall. Accordingly, investors may receive back less than originally invested. Past performance is not necessarily a guide to future performance. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related investment mentioned in these reports. In addition, investors in securities such as ADRs, whose value are influenced by the currency of the underlying security, effectively assume currency risk. ESN, its Members and their affiliates may submit a pre-publication draft (without

mentioning neither the recommendation nor the target price/fair value) of its reports for review to the Investor Relations Department of the issuer forming the subject of the report, solely for the purpose of correcting any inadvertent material inaccuracies. Like all members employees, analysts receive compensation that is impacted by overall firm profitability For further details about the specific risks of the company and about the valuation methods used to determine the price targets included in this report/note, please refer to the latest relevant published research on single stock or contact the analyst named on the front of the report/note. Research is available through your sales representative. ESN will provide periodic updates on companies or sectors based on company-specific developments or announcements, market conditions or any other publicly available information. Unless agreed in writing with an ESN Member, this research is intended solely for internal use by the recipient. Neither this document por any copy of it may be taken or transmitted into Australia Canada or langer. nor any copy of it may be taken or transmitted into Australia, Canada or Japan or distributed, directly or indirectly, in Australia, Canada or Japan or to any resident thereof. This document is for distribution in the U.K. Only to persons who have professional experience in matters relating to investments and fall within article 19(5) of the financial services and markets act 2000 (financial promotion) order 2005 (the "order") or (ii) are persons falling within article 49(2)(a) to (d) of the order, namely high net worth companies, unincorporated associations etc (all such persons together being referred to as "relevant persons"). This document must not be acted on or relied upon by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

The distribution of this document in other jurisdictions or to residents of other jurisdictions may also be restricted by law, and persons into whose possession this document comes should inform themselves about, and observe, any such restrictions. By accepting this report you agree to be bound by the foregoing instructions. You shall indemnify ESN, its Members and their affiliates (and any director, officer or employee thereof) against any damages, claims, losses, and detriments resulting from or in connection with the unauthorized use of this

document.
For disclosure upon "conflicts of interest" on the companies under coverage by all the ESN Members and on each "company recommendation history", please visit the ESN website (www.esnpartnership.eu) For additional information and individual disclaimer please refer to www.esnpartnership.eu and to each ESN Member websites:
