Bologna, August 4, 2026 - The Board of Directors of Datalogic S.p.A. (Borsa Italiana S.p.A.: DAL), listed in the Euronext STAR Milan Segment of the Italian Stock Exchange organised and managed by Borsa Italiana S.p.A. and global leader in the automatic data capture and industrial automation segments, today approved the Consolidated Half-Year Financial Report at June 30, 2026.

In the words of **Datalogic Group CEO Valentina Volta**: *"The first half closed with results broadly in line with our expectations, despite a geopolitical and market environment that remains complex and characterised by high uncertainty.*
Group revenue grew by +3.7% (+6.2% net FX), with solid performance in the EMEAI and APAC regions, driven mainly by the contribution of Fixed On-Counter Scanners in the Data Capture segment and Logistic Automation applications in the Industrial Automation segment.
Margins continued to face strong cost inflation, especially memory prices, due also to the need to ensure continuity of supply and product availability, as well as higher logistics costs related to the current conflict in the Strait of Hormuz. However, the second quarter benefited from the positive effect of the import tariff refund, resulting in a slight improvement in the industrial margin in the first half versus first half 2025. Excluding this positive effect, the gross margin for the first half was broadly in line with expectations.
Despite a complex and highly uncertain geopolitical and market environment, demand across our end markets continues to trend upward. The positive sales and order intake trend supports our forecast for revenue growth this year, while the ability to maintain profit margins in line with the prior year will depend largely on whether the measures taken to restore profitability can offset rising material and logistics costs, which remain subject to significant inflationary pressure."

PERIOD HIGHLIGHTS

To provide a better presentation of the Group's operating results, starting from this Consolidated Half-Year Financial Report at June 30, 2026, revenue from the sale of Scan Engines to ODMs (Original Design Manufacturers), which assemble these Scan Engines into finished products that they subsequently sell to Group companies, is recognised as a reduction in Cost of goods sold rather than as Revenue. This reclassification has no effect on either operating profit or on operating results, which remain unchanged in absolute terms. The comparative figures for the prior year were restated in line with the new classification.

The following table summarises the Datalogic Group's key income and financial results at June 30, 2026 versus the same period of the prior year.

To better align with its strategic goals and prioritise product and solution offerings, the Group identifies two Market Segments, which feature distinct sales models, customers with varying purchasing needs, and different stakeholders: Data Capture and Industrial Automation.

The following is a breakdown of Group revenue split up by these market segments:

	30.06.2026	%	30.06.2025 Restated	%	Change	% chg.	% chg. net FX
Data Capture	164,169	66.1%	159,938	66.7%	4,232	2.6%	5.5%
Industrial Automation	84,267	33.9%	79,682	33.3%	4,585	5.8%	7.2%
Total revenue	**248,436**	**100.0%**	**239,620**	**100.0%**	**8,816**	**3.7%**	**6.2%**

- ### Data Capture

The **Data Capture** segment increased by 2.6% versus the same period of the prior year, driven by strong growth in APAC and EMEAI, partly offset by a decline in Americas.

- ### Industrial Automation

The **Industrial Automation** segment increased by 5.8% versus the same period of the prior year, driven particularly by Logistic Automation applications. Performance across the various geographies was similar to that of the Data Capture segment, with growth in EMEAI and APAC partly offset by a decline in Americas.

The **Gross Operating Margin,** amounting to €107.7 million, increased by €4.3 million versus €103.4 million in first half 2025. Its share of sales increased slightly to 43.4% versus 43.2% in the comparison period, due mainly to the positive effect of higher volumes and the refund of US import tariffs, partly offset by an adverse mix and higher costs for certain electronic product components.

Operating costs and other expense, at €107.1 million (€98.8 million at June 30, 2025), increased by €8.3 million in absolute terms and by 1.9 percentage points as a proportion of sales.

Research and Development expense, amounting to €37.6 million, increased by 13.9%. Total monetary costs in R&D, i.e., before capitalisation and net of amortisation and depreciation (R&D Cash Out), amounted to €33.8 million (€32.8 million in the first half of the prior year), with a percentage of sales of 13.6% (13.7% in the same period of 2025).

Distribution expense amounted to €48.4 million, up 9.5% versus the same period of 2025, and accounted for 19.5% of revenue (18.4% in the first half of the prior year).

Administrative and General Expense, equal to €21.0 million, decreased by 3.3% versus the same period of 2025; as a percentage of sales, it declined to 8.5% versus 9.1% in first half 2025.

Adjusted EBITDA came to €16.7 million, down from €20.8 million in the same period of the prior year, accounting for 6.7% of sales (8.7% in first half 2025).

Adjusted EBIT came to €0.6 million (€4.7 million in first half 2025).

Net financials came to negative €1.2 million (positive €1.6 million in first half 2025).

The **net loss** for the period amounted to €3.3 million versus a net loss of €0.8 million in first half 2025.

Net Invested Capital, equal to €420.2 million (€410.6 million at December 31, 2025), increased by €9.7 million, attributable mainly to the increase in Net Trade Working Capital, detailed below.

Fixed Assets amounted to €436.5 million (€428.8 million at December 31, 2025), increasing by €7.7 million, attributable mainly to expenditure in tangible fixed assets made during the period and the positive change in Goodwill due to the depreciation of the Euro against the US dollar.

Net Trade Working Capital amounted to €73.9 million, up €12.0 million versus December 31, 2025, due to the increase in inventory, partly offset by the decrease in trade receivables and the increase in trade payables; as a percentage of sales, it increased from 12.5% at December 31, 2025 to 14.6%.

Net Financial Debt at June 30, 2026 stood at €25.8 million, increasing by €11.0 million versus December 31, 2025 and by €7.6 million versus June 30, 2025.

SIGNIFICANT EVENTS IN THE PERIOD

On May 29, 2026, Hydra Investimenti S.p.A., a company wholly owned by Hydra S.p.A., Datalogic S.p.A.’s majority shareholder, launched a voluntary full public tender offer for Datalogic ordinary shares. At its meeting on June 26, 2026, the Company’s Board of Directors approved the press release (the “Issuer’s Press Release”), prepared pursuant to Article 103, paragraph 3, of Legislative Decree No. 58 of February 24, 1998, as subsequently amended and supplemented (the “TUF”), and Article 39 of the Regulation adopted by CONSOB Resolution No. 11971 of May 14, 1999, as subsequently amended and supplemented (the “Issuer Regulation”). Among other matters, the Issuer’s Press Release contains the Board of Directors’ reasoned assessment of the Offer and the fairness of the related consideration.
For the purposes of approving the Issuer’s Press Release, the Board of Directors considered, among other matters: (i) the opinion issued by the Company’s independent Directors on June 26, 2026 pursuant to Article 39-bis of the Issuer Regulation (the “Opinion of the Independent Directors”); (ii) the fairness opinion on the financial fairness of the consideration offered by the Offeror under the Offer, issued by Nomura Financial Products Europe GmbH, Italian Branch, as independent expert appointed by the Company’s independent directors; and (iii) the fairness opinion on the financial fairness of the consideration offered by the Offeror under the Offer, issued by Equita SIM S.p.A., as independent expert appointed by the Board of Directors.

The Company's Board of Directors therefore resolved that the consideration provided for under the Offer was fair from a financial standpoint.

EVENTS AFTER THE END OF THE PERIOD

On July 21, the Offeror, Hydra Investimenti S.p.A., announced that, based on the final results, at the Payment Date the Offeror, together with the Persons Acting in Concert, would hold a total of 55,847,355 Shares, representing 95.55% of Datalogic's share capital, in the absence of any further purchases of Shares that the Offeror reserves the right to make.

In light of the final results of the Offer, the legal conditions have been met for the exercise of the Squeeze-Out Right, which the Offeror stated in the Offer Document that it intended to exercise, and for fulfilment of the Purchase Obligation pursuant to Article 108, paragraph 1, of the TUF in relation to the remaining 2,599,136 Shares, equal to 4.45% of the Issuer's share capital, or the lower number of Issuer Shares resulting from purchases that may be made by the Offeror up to the Delisting Date (the "Remaining Shares"). The Offeror will exercise the Squeeze-Out Right pursuant to Article 111 of the TUF and, at the same time, fulfil the Purchase Obligation pursuant to Article 108, paragraph 1, of the TUF in respect of the Shareholders who have requested it, thereby implementing a single procedure, the terms and conditions of which will be agreed with CONSOB and Borsa Italiana pursuant to the Issuer Regulation (the "Joint Procedure"), covering all the Remaining Shares.

BUSINESS OUTLOOK

Despite a complex and highly uncertain geopolitical and market environment, demand across the Group's end markets continues to trend upward. The positive sales and order intake trend supports the forecast for revenue growth this year, while the ability to maintain profit margins in line with the prior year will depend largely on whether the measures taken to restore profitability can offset rising material and logistics costs, which remain subject to significant inflationary pressure.
