Datalogic Debuts the Memor™ 20 Industrial PDA at MODEX 2020

Eugene, OR, March 03rd 2020. **Datalogic**, a global leader in the automatic data capture and process automation markets, will debut the Memor™ 20 enterprise PDA at MODEX 2020. This rugged, industrial PDA can face the toughest challenges in applications with rigorous environments like manufacturing plants, warehouses, courier/delivery and distribution centers.

The new Memor 20 is a unique device that brings together powerful processing power, extreme ruggedness, large 5.7" HD touch screen, and intuitive Android operation in a smartphone form factor that is easy to hold, easy to use and very user friendly.

"We designed the Memor 20 for enterprises that have the most demanding mobile requirements, such as: distribution centers, where employees are up and down aisles and using forklifts; warehouses for inventory management, order picking, shipping and receiving; transportation where drivers are out on the road and required to log each package during long delivery days," said Tom Burke, Vice President of Mobile Product Marketing at Datalogic. "The Memor 20 is the top-performing device in the product family, offering a range of unique features to assist different types of workers at every level of business operation."

To guarantee constant 24/7 operation, Memor 20 comes with extremely fast wireless charging technology. This technology, proven in the smartphone market, ensures quick and easy charging and at the same time reduces downtime and maintenance caused by dirty or defective contacts. Additionally, the one-piece battery can be swapped by users in the field. The Memor 20 also offers a complete complement of accessories including a pistol grip handle for scan intensive use, vehicle mount dock for transportation applications, and an exclusive Smart Dock with a unique locking function that secures the device preventing unauthorized use, loss or theft.

An extensive list of features includes a novel secondary notification display on the top of the device. This display allows users to immediately see a preview of incoming notifications while pocketed or holstered, improving user productivity in today's multitasking, hands-free environments. The Memor 20 joins the Memor family of Datalogic products which are the industry's first devices to combine wireless charging technology with a one-piece swappable battery.

Visitors can personally experience the Memor 20 in Datalogic booth 5227 at MODEX.

Datalogic Group

Datalogic is a global leader in the automatic data capture and process automation markets, specializing in the design and production of bar code readers, mobile computers, sensors for detection, measurement and safety, RFID vision, and laser marking systems. Datalogic solutions help increase the efficiency and quality of processes in the retail, manufacturing, transportation and logistics, and healthcare industries along the entire value chain.

The world's leading players in these industries use Datalogic products, certain of the attention to the customer and of the quality of the products that the Group has been offering for 47 years. Today Datalogic Group, headquartered in Bologna (Italy), employs approximately 3,200 staff worldwide, distributed in 28 countries, with manufacturing and repair facilities in the U.S.A, Brazil, Italy, Slovakia, Hungary, Vietnam, China, and Australia. In 2018, Datalogic had a turnover of 631 million Euros and invested over 61,9 million Euros in research and development, with an asset of more than 1,200 patents in multiple jurisdictions.
